Implementation Assistance: LEAP

Going through a Workday® implementation is a hill to climb for any organization, no matter the size or complexity. That's why Syssero built LEAP, the only launch enhancement assistance program in the Workday® ecosystem designed specifically for Workday's Accelerated Deployment Methodology.

LEAP
Forward with Us

With LEAP, you get a dedicated Syssero team made up of experts who have been Workday® end-clients, just like you. This includes:

- Project Managers
- Functional Configuration Experts (HRIS/FIN/AP)
- Technical Integration Experts

Learn more about our services:

1 WORKDAY® IS SELECTED

Prepare: Before implementation begins, we'll help assess your needs, ensure data integrity and prepare/prioritize the impending requirements you'll owe Workday®.

1. System needs assessment
2. Data clean up and conversion preparation
3. Pre-Workday® fundamentals training
4. Internal team alignment and change management

2 IMPLEMENTATION

Assist: As you work through the implementation process, we're supporting you all along the way. Acting as an extension of your internal team, we'll help you overcome the analysis paralysis and protect your go-live date.

1. Workbook population assistance and translation
2. Testing assistance and script expansion
3. "Out-of-scope" protection
4. Roadmapping

3 PLATFORM LAUNCH

Optimize: Once you've reached go-live, it's time to begin system optimization. We'll work alongside you to add functionality, connectors, reports, dashboards and all the bells and whistles that made Workday® the right choice for your organization.

1. Custom documentation
2. Enhanced "ownership" training
3. Additional SKUs
4. Platform polish

> " *I would not talk to anyone going live with Workday® without telling them they need to select a partner like Syssero. It was a game-changer for the implementation.*
>
> - Courtney K, SVP People Services, Neighborly
